Celebrating 50 Years!

CELEBRATING
fifty years

Ames Construction, Inc.®

Ames Construction has been successfully providing comprehensive heavy civil and general contracting services to clients for over 50 years. Ames is an experienced self-performer on projects that include:

- Design-Build
- Heavy Industrial
- Power
- Water Resources
- Transportation
- Mining
- Environmental
- Commercial/
Residential

Master•Builder

We build an environment for success through solution driven teamwork – in our company, with our partners throughout the design and construction process, and within our communities.

INTEGRITY | LEADERSHIP | PASSION | EXCELLENCE

www.swinerton.com

Dear Industry Leader:

Welcome to DBIA's 2012 Membership. As the only organization that defines, teaches and promotes best practices in design-build, this directory is one of many DBIA tools designed to help you identify those who have embraced, understand, and successfully execute design-build.

At the core of our mission is our goal of promoting the value of design-build project delivery and teaching the effective integration of design and construction services to ensure success for owners and design and construction practitioners. As you'll note from the individuals and firms listed in the directory, DBIA has a diverse membership representing the full spectrum of design and construction, and serves as a forum to network and build synergy among the many players, including owners. This diverse membership is one of many reasons we are well suited to help ensure your success.

Among the numerous organizations that serve the design and construction industry, only DBIA develops products and services with the success of the entire team in mind, including the owner. The varying perspectives of our membership are considered in developing our best practices. And like successful design-build, consensus is reached based on open, honest dialogue, give and take among key players, and ultimate consensus on what is best for the industry as a whole.

I encourage you to look beyond this directory to the other many resources available through DBIA. Among them is our Manual of Practice, a comprehensive compendium of chapters focusing on best practices and key elements of success design-build. This downloadable document is free to all members by visiting www.dbia.org.

To further demonstrate your commitment to design-build excellence, we also encourage you to take advantage of our wide range of educational courses – both in person and online. And while you're at it, consider taking steps to become a certified design-build professional to further showcase to industry your comprehensive knowledge and experience in design-build.

Your participation provides the foundation for our organization's continued success, and for the successful evolution of the design and construction industry.

We look forward to your active involvement in shaping the future.

Sincerely,

A handwritten signature in dark ink that reads "Lisa Washington". The signature is fluid and cursive, with a large initial "L".

Lisa Washington, CAE
Executive Director

Digital Steel Joist Specifications...at your fingertips.

The leader in 3D BIM-based steel joist design proudly introduces yet another first. Built upon our engineering expertise in steel joist and metal decking, and backed by our database of SJI 43rd Edition tables, we pack the power of our latest specification catalogs into advanced web and mobile applications.

- **Easier and faster specification**
- **Fully updated to SJI 43rd Edition specs**
- **Helpful cost-saving guidelines and options**
- **Mobile app for on-the-go convenience**
- **Complete tools for Steel Joists & Joist Girders**
- **Metal Decking tools coming soon!**

UNMATCHED RELIABILITY

For over 50 years, Vaughan Chopper Pumps have offered **guaranteed** performance in the toughest applications. See why the original chopper pump is still unmatched:

- Expedited Pumps and Parts
- Guaranteed Performance in Writing
- Superior Life Cycle Costs
- Multi-Million Dollar Inventory
- 30+ Proven Patents
- Hardened Wear Components
- Special Materials Available Include: CD4MCu, 316SS, Chrome Iron, and Alloy 20

Kalwall Corporation has developed a unique service to help design/build professionals validate effective daylight plans when utilizing Kalwall translucent building systems. Just as traditional and 3-D computer modeling show a finished design's appearance, site-specific daylight simulation demonstrates the impact of size, type, and placement of skylights, windows, or translucent wall systems. Computer-generated charts and light-level schematics simulate the effects of various daylighting alternatives, enabling designers to analyze how light will behave before plans are finalized.

AEC Staff Pros

Your project staffing needs can be met through **AEC Staff Pros**.

Your project plus our people equals performance! Our M/WBE certifications will help fill those critical resource needs as well. We specialize in the non-engineering areas of document management, information technology and web portal solutions, submittal coordination, and administrative support.

Contract-to-hire options available also. Call today to get the process started! (Serving U.S. only).

Phone: 303-895-1776

Email: InfoRequest@AECStaffPros.com

StormPave & RainPave Permeable Clay Pavers

Municipalities nationwide are adopting regulations for stormwater runoff. The EPA encourages cities and towns to implement green infrastructure to combat stormwater pollution.

StormPave has the look of traditional pavers and meets the ADA requirement for maximum joint width (<1/2"). RainPave is tumbled after firing to give the look of cobblestone. Both styles have a compressive strength above 12,000psi, are extremely freeze/thaw durable and have a life expectancy of more than 100 years. Using our colors with recycled content and SRI values >29 in either StormPave or RainPave permeable clay pavers can help qualify in up to five LEED categories.

Since 1974, Airco Mechanical, Inc.
has been exceeding client
expectations by designing and
installing state-of-the-art
mechanical systems in commercial
buildings throughout Northern
California. As the leading design
build mechanical contractor in our
region, our specialties include
heating, ventilation and air
conditioning systems, plumbing
systems, process piping, and
environmental control systems.
From large medical and industrial
facilities to small office tenant
improvements, Airco Mechanical,
Inc. provides cost and energy
efficient mechanical systems for
major commercial, industrial and
institutional projects throughout the
region.

Airco Mechanical Inc. - cont'd

Our facility of over one hundred thousand square feet of sheet metal and piping facility is cutting edge in the industry. We take a team approach to every project, with project managers, engineers, estimators, environmental controls specialists, and support staff taking every job from inception to completion. Together we provide exceptional service and expertise for projects large and small. Licensed in California, Nevada, and Arizona.

Akerman manages the legal aspects of major construction initiatives and infrastructure projects around the world, providing practical counsel on contract formation and administration issues, as well as construction litigation, arbitration and mediation

services. We are recognized for our experience in transportation, energy, public infrastructure, housing, government facilities, and healthcare projects. Our team serves a wide array of industry participants including contractors, public and private owners, designers, insurance carriers, sureties, and lenders. We advise clients on the selection of project delivery systems, risk allocation strategies, government contracting, and the negotiation of contract documents, procurement procedures, and construction liens.

Allied Engineering, Inc. (AEI) has been providing multi-discipline engineering support to our clients since 1958. Our experience lies in our knowledge and understanding of Structural, Mechanical, Electrical, Building Commissioning and Technology systems for new buildings and renovation design projects. Our expertise is demonstrated in our attention to detail, integrated designs, and our excellent reputation. AEI has the advantage of having most disciplines under one roof. We are a team player, working for architects as well as leading full-service teams as a prime consultant. We flourish in all project delivery methods, including traditional design-bid-build, design-build, and construction management.

The Bennett Group, Ltd., is a multi-faceted Design/Build company in Southern New Jersey. We specialize in commercial, retail, religious, medical professional buildings. We employ a staff of architects, construction and project manager, and field superintendents. Our specialty is turnkey construction. As design professionals, we have developed a method to integrate the art of design and techniques of construction into a single-source responsibility Project Delivery System. Our philosophy is that true cost and timesavings can only be achieved through this process.

The Beck Group offers a full
spectrum of professional services
including development, planning,
architecture, interior design,
construction, sustainability
consulting, and technology
development. More than
450 architects, intern architects,
construction managers, engineers,
real estate professionals, and
seasoned field and corporate staff
are employed in our Atlanta, Austin,
Dallas (headquarters), Denver, Fort
Worth, Houston, Mexico City, San
Antonio, and Tampa offices.
Founded in 1912, the firm has
completed numerous high-profile
projects, including the Nasher
Sculpture Center, Baylor University
Sciences Building, Firewheel Town
Center, Duke University Michael W.
Kryzewski Center for Athletic
Excellence, St. Mark's School of
Texas Centennial Hall & Hoffman
Center.

TYPES OF PROJECTS:

Environmental, Water/Wastewater

Befesa WaterBuild offers design,
construction, operations, and
financing services for a variety of
projects in the municipal,
industrial, and agricultural sectors,
including:

- Desalination (groundwater,
surface water, seawater);
- Water (membrane treatment,
conventional treatment, storage
and conveyance);
- Wastewater (membrane
treatment, reuse and recycling,
conventional treatment);
- Irrigation (gates and control
structures, canal lining and
pipeline conversion, automation
and control); and
- Renewable energy.

Befesa WaterBuild is a sister
company to Texas-based NRS
Consulting Engineers, and a
subsidiary of Befesa. As such, we
are proud to be an American
company with global experience.

Bell has a vast understanding of
Design-Build and believes the key
to a successful Design-Build project
is an integrated team approach.
Bell has completed numerous
Design-Build projects in healthcare,
correctional facilities and
governmental facilities. Bell's
experience in Mechanical,
Plumbing, and General
Construction allows us to maximize
understanding and control of a
project's schedule and minimize
cost. Bell self-performs some of the
most difficult and complex
components of a construction
project.

BLOC Design-Build, LLC - cont'd

BLOC Design-Build, L.L.C. is a design-build company specializing in heavy construction as well as instrumentation and controls. BLOC is a subsidiary of KSA Engineers, Inc., a Texas based civil engineering firm with more than 25 years of service to governmental and industrial clients.

BLOC is an acronym for "Bridging the Lines of Communication." This philosophy guides our attitudes and actions as we execute your project. BLOC assembles teams of engineers, architects and contractors that can best provide you with the results you seek as an owner; one source responsibility, timely project completion and budgetary control. BLOC coordinates all aspects and stages of project from start to finish. The team members selected by BLOC all understand the benefits of the design-build concept and agree upon cooperation throughout the course of each project.

BlueScope Construction, Inc., is a design-build general contractor specializing in large industrial buildings and government facilities. Our parent company, BlueScope Buildings, is the manufacturer of several pre-engineered building (PEB) brands and this relationship not only allows us to be your single source for design, fabrication, supply and erection of PEBs, it also has the considerable added advantage of a one-stop warranty

program and relationships to national builder networks for local construction knowledge. Additional in-house services include concrete, scheduling, project management, on-site supervision and LEED services. Building specialties include distribution centers, warehouses, manufacturing plants, and other large clear span structures.

As the largest mechanical, electrical and plumbing services provider in Texas, Brandt has been designing, building, servicing and retrofitting energy-efficient building systems for more than 55 years. With more than 1,000 highly trained technicians on staff, the company can install equipment from any manufacturer, provide periodic maintenance service and mobilize quickly as service needs arise. Brandt's comprehensive in-house capabilities are provided by some of the industry's most experienced craftsmen and engineers to ensure that you receive a cost-effective solution - with minimal facility downtime - each and every time. Brandt maintains offices in Dallas, Fort Worth, San Antonio, Waco, and Austin.

Brown and Caldwell's extensive experience across the U.S. as a design-build partner or in a similar role allows us to understand the regulatory, design, constructability, scheduling, cost control, quality, procurement, and project management issues unique to design-build delivery. Applying this understanding, we help clients simplify the design and construction process, achieve higher quality, expedite schedules, and reduce costs.

Bruce & Merrilees is a trusted partner for high-tech electrical projects. Core services include energy services, industrial and commercial electrical services, high voltage construction, transportation electrical systems, and ongoing maintenance and service projects. Professional project management, deep expertise and proven processes streamline projects. They are safely completed on time, within budget, and to the highest standards. We provide the manpower, materials, and commercial development and transportation projects. Organizations across the country turn to us to design, build, and maintain complex electrical and communications infrastructures.

Buckland & Taylor Ltd. (B&T) provides specialized bridge engineering services to clients worldwide from its head office in North Vancouver, BC, Canada, its offices in Edmonton, AB and Halifax NS, Canada and from its US office in Seattle, WA. Founded in 1972, the Company is recognized throughout North America and internationally as a leader in the design, design-build, evaluation, rehabilitation and construction engineering of bridges of all types and all sizes. B&T's work is split between bridge owners and bridge contractors, keeping our designers on top of current construction techniques, leading to more

constructible designs sensitive to the requirements of the Contractor, Owner and Owner's Engineer.

BURGESS & NIPLE

When the results matter now... and years from now.

For 100 years, Burgess & Niple (B&N) has led the development of infrastructure in rural and urban regions. Our success is driven by a passion for advancing the built environment with exceptional concern for quality of life, safety and sustainability.

B&N's team of in-house professionals includes planners, engineers, environmental scientists, architects, geologists and much more. Our work spans the world

and ranges from complex, urban renewal projects to finding potable water for arid, rural villages.

Burns & McDonnell is a 106-year-old, 100% employee-owned, professional services design-build firm. Burns & McDonnell's design-build philosophy entails developing and maintaining an integrated and partnered approach focused on meeting the requirements of the Client, the user groups, and our design and construction professionals. We remain focused on the Client's needs by identifying and resolving issues and potential changes as early in the project. By "fast-tracking" construction through a preplanned and phased approach we are able to maintain safety, cost, and schedule control throughout the project. This integrated approach has proven effective on numerous past

projects, resulting in completion on, or ahead of, schedule with minimal impacts on the cost. Burns & McDonnell has successfully performed design-build projects for more than thirty years with this approach and offers a true "single source" responsibility focused on making our Clients successful.

Our construction attorneys represent virtually every participant involved in the private and public construction arenas, including general contractors, subcontractors, suppliers, owners, developers, and design professionals. We have extensive experience in Design-Build projects as well as projects delivered by other methods such as Design-Bid-Build and Construction Management. Our depth of experience in counseling, planning, negotiating, and actively participating in every phase of the construction process allows us to operate effectively and cost efficiently on our clients' behalf. Our lawyers are fully experienced in representing clients from the initiation of projects and preparation of contract documents through dispute resolution, including negotiation, mediation, arbitration and litigation.

BVH Integrated Services is a multi-disciplined engineering firm providing civil, structural, mechanical and electrical design, as well as commissioning and technology design services. By uniquely integrating the core engineering disciplines, BVH provides an unmatched combination of expertise and services, all in one in-house team. For more than 50 years, BVH has been providing personal service and creating solutions for building and infrastructure projects under the traditional delivery methods, as well as design-build delivery. Recognized for its leadership on successful building and commissioning projects in several states, BVH produces hundreds of projects annually for educational, healthcare, corporate, municipal, and research clients.

CCI designs, furnishes, installs, and maintains HVAC, plumbing, process, and control systems. Commercial, industrial, energy, and advance technology work comprise our primary markets, as well as some high-end residential and specialty metal fabrication. CCI was established in 1961 and has in-house engineering, pipe and sheet metal fabrication, controls professionals, NEBB certified commissioning, along with sheet metal, pipefitting, and plumbing service and installation personnel, believing in a sole-source method of providing design-build services.

CDM is a full-service consulting, engineering, construction, and operations firm delivering exceptional service to public and private clients worldwide. CDM's design-build and alternative delivery methods save money, reduce schedules, and satisfy competing demands—helping clients achieve their goals. Since not every delivery method is right for every situation, CDM offers multiple delivery options that consider clients' unique objectives and capabilities—design-build, design/CM-at-risk, CM-at-risk, design-build-operate, and design-contract-build.

Center Square Builders (CSB) is a 31-year young, quality driven, economically-minded design-build firm. We offer a multitude of services, which integrate seamlessly into your plans for whatever construction, building addition or fit out you may encounter. CSB provides design and construction services to develop a facility that meets your requirements for efficient operations, tight deadlines, and sensible budgets. With licensed design professionals on staff, we offer value engineering services that will save you money and won't sacrifice the integrity of your project.

We are a wholly owned subsidiary of Turtle Associates, a tribally owned 8A firm. We construct facilities for computer integration system, food processing, R & D, parcel sorting, recycling, warehouse/distribution, and various manufacturing needs, as well as hospitality, retail and professional centers.

Tacoma is Washington State's third-largest city, with approximately 203,400 residents. Located at the foot of Mount Rainier and along the shores of Commencement Bay, Tacoma is recognized as a livable and progressive international city. The architectural history and renaissance is impressive. Tacoma is truly one of the Northwest's best-kept secrets with our big-city attractions and small-town feel. Looking back on the last 20-plus years of strategic investments in Tacoma, a pattern reveals itself. It's a pattern of purposeful choices, one after another. Tacoma's economy is growing and sustainable, a perfect blend of traditional and the innovative. www.cityoftacoma.org

Clay Development & Construction, Inc. is a developer and design/build of industrial build-to-suit facilities for sale or lease since 1998. We are a turnkey developer of metal and tilt wall projects with a combined 175 years experience in the real estate business. With in-house staff, we purchase the land, design the site, coordinate utilities to the project, construct the facility, and sell or lease the project to our client.

Clay has developed projects that range from a 10,000 square foot office building to a 160,000 square foot, 54' eave freezer building to a 900,000 square foot distribution facility. During the first 14 years of operation, we have developed 160 industrial and office building comprising approximately 9,500,000 square feet with costs exceeding \$500 million. In addition to single building development, Clay has developed 26 industrial parks totaling over 1,100 acres, and has purchased many other smaller tracts for development.

Clay affiliates currently own and manage over 2,000,000 square feet of company developed space in 56 buildings.

Coler & Colantonio, Inc. provides engineering and scientific consulting, and construction services, to the Energy, Geospatial Technologies, Government, and Land Development Market Sectors. Our clients benefit from our ability to leverage resources from a variety of professional disciplines within our organization including: civil and surveying engineering; GIS and land information; and, environmental, engineering, sciences and permitting. Our professionals share a passion for delivering creative and technologically advanced engineering solutions; an approach that saves our clients time and money. The diversity of our services, all under one roof, allows us to provide our clients a "one-stop shop" of creative engineering solutions.

Our goal as a design build company is to build a relationship with our customers at the beginning of a job and continue it well into the future. The foundation for this type of relationship begins with trust as the cornerstone. Honesty, integrity and reliability are the attributes that have contributed to our outstanding reputation in Arizona as a quality driven mechanical contractor.

CPI can be your sole source for translucent daylighting. We design fabricate and install custom and standard Skylights, Wall Lights and Canopies. Natural light is one of the most important design elements in today's sustainable construction market. CPI's unique technology offers more control over light than other daylighting systems, while providing stunning designs that will remain contemporary for years to come. No competitor offers the wide selection of colors, light transmission levels and configurations available with CPI's NanoCell® polycarbonate glazing technology. Take time today to see what will happen to your projects when Quality Comes to Light® with CPI.

Founded in the mid-70's, with a belief that excellent engineering is a prerequisite for design-build, Critchfield Mechanical, Inc. (CMI) has grown steadily by adding one to three newly graduated mechanical engineers each year. CMI's five-year training program has developed a highly skilled complete design-build mechanical contracting team of engineers, sheet metal workers and pipe fitters. CMI's goal on each project is to maximize occupant comfort, minimize operating costs, and maintain competitive first cost for construction. With 25 years of diverse experience, CMI is certain that a concerted team effort between trades during design and construction allows the optimum productivity and quality of construction.

Degenkolb Engineers is a 70-year
old, employee-owned company that
has grown steadily to more than
170 people. The firm is
distinguished by the use of the
latest analytical techniques, regular
employment of performance-based
design principles, and the ability to
express complex technical issues in
ordinary language. The staff is
directly involved in technical
innovation through participation in
the development of seismic codes
and evaluation guidelines. Global
earthquake reconnaissance has
been an integral part of
Degenkolb's culture for more than
40 years. The insight gained allows
professional staff to provide a
unique style of engineering to
clients in seismic risk zones.

Development Industries, Inc. is a full-service Construction Management firm specializing in Design Management, Project Management and Construction Quality Control. Representing owners, developers and general contractors, we excel in providing QA/QC and overall Quality Management on design-build projects during the entire design and construction process, including planning, permitting, daily on-site owner representation, and project close-out. With a focus on large scale commercial buildings, our current and past clients include both public and private sector organizations such as the State of California Department of General Services (DGS), the Los Angeles Unified School District (LAUSD), the US Army Corps of Engineers, The Clark Construction Group, Bovis Lend Lease, and DMJM/AECOM. Since 2001 our experienced staff has provided services on projects ranging from \$50 Million to over \$650 Million in total construction costs. DI is a Small Business Enterprise (SBE) headquartered in the Los Angeles metropolitan area. We have a strong commitment to

our clients, to provide the highest quality services and the highest quality personnel.

Founded in 1979, Dikita Enterprises, Inc., is an established, successful engineering and consulting firm, providing quality services to both public and private sector clients for over 30 years.

Dikita operates through two divisions:

Dikita Engineering provides civil engineering, planning, program / construction management, and light rail vehicle inspection and QA services for public transit, aviation, roadways & highways, and educational & governmental facilities.

Dikita Management Services provides management and planning assistance for transit and public agencies, especially as it relates to transit studies involving data collection, ridership analysis & reporting, service & facility planning, cost modeling, and cost benefit analysis.

Drewry Simmons Vornheim, LLP is an Indianapolis based law firm that focuses its practice on construction industry participants. We have experience representing and advising Owners, Contractors, Subcontractors and Designers through all phases of a construction project in both the private and public sector. Our intimate knowledge of the industry allows us to provide our construction clients with sound and timely legal advice to profitably navigate through the difficult world of construction. We seek to form long term relationships with our clients allowing us to advise them on a wide range of matters including general corporate and regulatory work, project related contract negotiation, dispute resolution/litigation, and labor and employment.

Dunn Building Company is an industrial and commercial building contractor that provides design/build and general contracting services across the Southeast. Dunn performs projects of all sizes, and through its Plant Services and Small Projects Division provides continuous maintenance for industrial facilities. Based upon its self-perform capabilities, Dunn provides specialty contracting for concrete, pre-engineered building, and metal siding/roofing work. Dunn maintains the highest safety, quality, schedule, and cost controls, which are necessary to compete for attractive building projects. The Dunn companies have been in business since 1878, and are active DBIA members.

Ehrlich Architects (EA) is
internationally-recognized for
distinctive design, which extends
the traditions of California
modernism through an approach
that fuses new technologies with
cultural and environmental
sensitivity. EA has been recognized
with such prestigious accolades
including 8 National AIA awards
and was chosen as the 2003 Firm
of the Year by the California AIA. The
firm also has an impressive track
record delivering method, including
the 2009 National DBIA Award
(Public Sector Building Over
\$25 Million) for the 235,000 sf
ASU Walter Cronkite School of
Journalism. Other recent design-
build projects include the 75,000
sf Contemporary Arts Center for the
University of California, Irvine and
the 57,000 sf John M Roll U.S.

Flatiron, with a construction volume
of more than \$1 billion, is one of
the leading providers of
transportation construction and civil
engineering in North America.
Flatiron develops innovative
solutions to construct infrastructure,
including roads, bridges, tunnels,
and rail transit, for both public and
private clients. Flatiron also
operates as a contractor in design-
build and public-private partnership
projects. Founded in 1947, the firm
is a subsidiary of HOCHTIEF, one of
the world's leading international
construction service providers.

The Flintco Companies, Inc. is the
parent company of two construction
operating divisions: Flintco, Inc. and
Oakridge Builders, Inc. Founded in
1908 and in its third generation of
private ownership, The Flintco
Companies is the largest American
Indian-owned construction
company and is one of the largest
commercial contractors in the
nation. The Flintco Companies'
operating divisions provide a full
range of construction services,
including preconstruction,
construction management, design-
build, program and project
management, as well as general
contracting from nine offices in:
Albuquerque, N.M.; Austin, Tex.;
Memphis, Tenn.; Oklahoma City,

Okl.; Sacramento, Calif.;
Springdale, Ark.; and two offices in
Tulsa, Okla. With a well-deserved
reputation as a provider of
"constructive solutions," The Flintco
Companies is consistently selected
as the contractor of choice by
clients with construction needs in
the areas of healthcare, corporate,
education, office, sports,
corrections, hospitality, utilities,
governmental, and not-for-profit
facilities. For more information, see

GAI Consultants, Inc. is a
700-person engineering and
environmental consulting firm with
over 50 years of experience
delivering innovative engineering
solutions. Through engineering
expertise and a broad, deep
knowledge of regulatory processes,
we transform ideas into reality with
solutions that make a real

difference to our clients... solutions
in energy, transportation, real
estate, water, municipal,
government, and industry. How We
Get Your Job Done We carefully
listen to our clients' goals and
concerns. Our People focus on
management and completion of the
project. Clear and straightforward.
With a practiced staff of engineers,
scientists and other professionals,
GAI approaches every endeavor
with enthusiasm and integrity.

Throughout every stage of every
project, Our Leaders direct us in
maintaining high ethical standards
and observing stringent safety
measures. And because we
carefully match our staff credentials
to meet our clients' needs, we
deliver productive and effective
relationships. Our Clients Our
clients are highly respected global
companies, local firms and federal
and state agencies. They build
roads and bridges, transmission
lines, power plants, convention
centers, distribution centers and
industrial facilities in major
metropolitan districts and rural
areas both nationwide and abroad.
They challenge us with high profile
projects that demand some of the
best and brightest technical
expertise available. From
environmental regulations to
roadway and bridge design, to land
development, the combination of a
no-nonsense approach and Our
Culture continues to draw our
clients faithfully back to us. More
than 80% of our clients have built a
long-lasting working relationship
with us because they trust we will
meet and deliver on our promises.
Where We're Headed Our vision for
the future is to build upon over 50
years of success. To grow
responsibly as a healthy, profitable
engineering consulting firm. To
anticipate the needs of our clients
by keeping up with changing and
improving technologies. To fully
support our staff, so they can
deliver on our promises to our
clients. Our Mission is to operate
consistently, allowing our clients to
benefit their communities' health
and safety with the assurance that
their projects will endure and
withstand the test of time. We have
one measure of success: our
clients' satisfaction.

GFPDC provides complete design-
build and construction
management at-risk services to
owners in both the public and
private sectors. GFPDC provides a
single source of responsibility that
owners can rely upon to deliver
finished projects that will meet their
criteria for quality, schedule, and
cost. Contracting with GFPDC allows
owners to concentrate on what they
do best, taking care of their
everyday business, while GFPDC
manages the design, construction,
and startup of the project. This
scenario will also reduce the
owner's administration and
coordination efforts, to allow them
to focus on making timely decisions
with regard to the project.

Garver is a unified, multi-disciplined firm with A-E Design/Build project experience for individual, MATOC, and SATOC delivery processes. We provide high-quality architectural design and site, civil, structural, electrical, mechanical, and fire protection engineering services. We have the federal experience and capabilities to provide design, project management, and construction observation for civil, military, water, airfield, and Design/Build projects. Over the course of nine decades, Garver has expanded from one central Arkansas office to 12 regional offices with 300 employees, offering quality and award-winning expertise. Garver is consistently ranked in the Engineering News-Record's list of the top 500 design firms nationwide.

Guarantee Electrical Company has employed design-build concepts since the early 1960's, and those forty years of experience have allowed Guarantee to now be positioned to take full advantage of this rapidly growing method of project delivery. Currently, nearly 30% of our annual \$120 million in revenue is generated from design-build construction. GECO Engineering Corporation, Guarantee's wholly owned subsidiary, offers our electrical construction customers the edge of having one firm handle a construction project from concept to completion. Being charged with the electrical construction responsibilities for tens of millions of square feet in the St. Louis metropolitan region and across the nation underscores our mission, "To provide electrical services that exceed all of our customers' requirements and expectations."

Since 1978, Gould Electric has grown to become one of the largest merit shops in Southern California. Its growth is based on a client-centered attitude towards delivering our product. This philosophy builds a team environment, resulting in a strong client base, rich vendor resources, and quality subcontractors.

Our desire is to provide clients with the resources needed to make their vision a reality, manage project cost, and deliver on time. With our talented staff members and a wealth of industry experience, we ensure that issues are resolved in our Gould Constructability Process, thus mitigating risk while delivering an exceptional experience.

Gude Management Group (GMG) is an Atlanta-based provider of full service Construction Program Management Services founded in 2005 by Samuel L. Gude III. As a thirty year Construction Industry Executive working for a multi-national construction firm, Sam was Managing Director of their U.S. Federal Sector Operations and Executive Vice President for their Georgia K-12 Schools Construction Division. During his tenure he oversaw hundreds of projects nationally worth billions of dollars. Our professional staff has grown from the initial four employees to our current thirty-one. GMG was ranked in 2008 as the 6th fastest growing private company in Metro Atlanta by the Atlanta Business Chronicle. Our company is a Georgia Limited Liability Corporation headquartered at 133 Peachtree Street, NE, Suite 4900, Atlanta, Georgia, 30303. The company has provided comprehensive full service Program and Project Management services since its inception in 2005. Our employees have diverse industry related backgrounds in civil, industrial and mechanical engineering and construction management and include licensed engineers, architects and LEED Accredited Professionals. Our senior management core has on average twenty-five plus years of related experience in the oversight and management of large private and Public Construction programs. We are currently providing professional

Gude Management Group, LLC - cont'd

services to nine clients. Our public sector clients represent 95 percent of our business and include School Systems, and State and Municipal Agencies. Our balanced approach and qualified professionals deliver extensive Public Sector, Private Sector, and Information Technology expertise. Our client focused attitude is embodied in our mission statement "To assist our clients in realizing their vision." GMG's approach combined with our commitment to deliver best of class services sets the standard for our performance to ensure client satisfaction and that every project and program is kept on budget and on track.

Hankins and Anderson, Inc. has provided engineering services using the Design/Build project delivery method for more than 20 years. We have experience developing Owner's Requests for Proposals (RFPs), preliminary design "bridging" documents and RFP performance specifications. Full design services have been performed as a design-build team member for public sector clients covering a diverse range of project types including: Laboratories, Administrative, U.S. Embassy Facilities, Utilities/Infrastructure, U.S. Military Facilities, Mission Critical Facilities.

Hankins and Anderson, Inc. - cont'd

We have found that no singular contracting relationship fits all design/build project teams. In the past, we have contracted in a variety of design/build relationships; directly with the General Contractor, the Owner and Architect, and with construction Sub-Contractors (mechanical, electrical, site, etc.). Hankins and Anderson maintains a flexible attitude toward the contracting needs of our clients.

Over the past five years, we have witnessed a rapid growth of design/build projects. Currently, more than 50% of our firm's projects are being delivered under a design/build contract.

Harold O'Shea Builders is a fourth generation, family owned general contracting firm operating in Central Illinois since 1902. Harold O'Shea Builders provides Design-Build, Construction Management, General Contracting and Pre-construction services to a wide range of clients in the commercial, healthcare, educational, build-outs, municipal, religious, retail, and hospitality markets. The focus of Harold O'Shea Builders pre-construction planning is to give clients the opportunity to review multiple concepts as well as costs and schedules associated with their projects.

Harold O'Shea Builders' reputation is built on quality, integrity, trust and value. The success of our company has been built on a long list of successfully completed projects, owner relationships and repeat clients. We pride ourselves on exceeding our client's goals and delivering their project on time and within budget.

The law firm of Hawkins, Delafield & Wood has the largest specialized contract and finance practice for municipal public works and infrastructure projects in the country. We bring to the public-private partnership field a century of successful environmental, highway, transit and power project planning, legal analysis and implementation experience. Clients include hundreds of local, state and federal governmental bodies seeking comprehensive utility asset development and management by private service providers, and leading financial institutions, investment banking firms and multilateral lenders funding public works projects. The firm has represented local government in more than 60 water and wastewater private contract management transactions in the last 5 years valued at over \$3 billion. Annual project finance transaction volume averages in excess of \$5 billion. The firm offers special expertise in RFP procurements by public entities and in negotiating full service design-build and design-build-operate contracts, concessions and franchises.

Heery International is a full-service design, engineering and construction management firm with over 1100 employees located in offices throughout the United States and Europe. Recognized for service excellence by a broad spectrum of professional organizations and industry publications, Heery's talented multidisciplinary staff regularly exceeds client requirements-adding value at every turn. At Heery, we believe that a company can succeed only by balancing and using its primary resources-its people-in ways that maximize client satisfaction and individual talent. Heery stands alone in providing the right people at the right level of service. At Heery, diversity is our advantage. We pride ourselves on providing local resources backed by global strength and strategic vision. Heery can manage complex, multi-site projects, partner with third-party consultants or handle single-objective jobs.

Hensel Phelps ranks #16 in General Building and #25 in Design-Build based on year 2005 contracting revenues as reported in 2006 Engineering News Record. Along with Hensel Phelps, Phelps Development offers their clients a full range of turnkey solutions with single-source responsibilities for planning and executing their projects. Both companies offer the honest work ethic entrenched in every aspect of Phelps' operations.

Hensel Phelps has used the Design-Build process successfully for over 20 years on a myriad of construction projects and has served commercial, institutional, industrial, defense, and other specialty markets, such as high technology and manufacturing. Hensel Phelps has been honored with five National Design-Build Awards plus seven Design-Build Excellence Awards from the Design-Build Institute of America; eight AGC "AON Build America Awards" plus four "AON Build America Merit Awards"; the construction industry's Oscar; and seven of the prestigious AGC "Marvin M. Black Excellence in Partnering Awards" plus five "Special Recognition Awards."

The Hensel Phelps Design-Build delivery system was formalized in mid-1980 with the City and County of Denver's RFP release for the development, design, and construction of the Colorado Convention Center. Since this project, Hensel Phelps has become one of the nation's most successful Design-Build contractors, with 213 projects completed or in construction valued in excess of \$9 billion.

The Herrick Corporation has been working iron in California since 1921. We have fabricated and erected more than 2,000,000 tons of structural steel, resulting in more than 500 structures. The Herrick name is synonymous with integrity, quality and service. Our reputation has resulted in more than 60 awards on some of the most prestigious healthcare projects in California. Many projects are awarded to Herrick based on our proven ability to work with the design team, trade partners and jurisdictional bodies to develop a fully integrated design. We exist to serve our clients and their vision.

HighTec HVAC is a commercial industrial contractor specializing in design-build and value engineering projects. We can work from conceptual design parameters without drawings or specifications. We are called in on many projects to solve budget problems and usually are able to re-engineer the project, saving the client 10-25%. The majority of our work is on the East Coast and in the office, retail and commercial area. We can provide sealed mechanical drawings electronically over the internet and in paper form. We are an excellent team member with high problem solving capabilities. Highly experienced management team on small to million+ projects. Bondable up to five million dollars. Complete concept, design, installation, and service capabilities. Memberships include Associated Building Contractors, ASHRAE and RSES.

HMC Architects - cont'd

Since 1940, HMC Architects' work has been driven by the belief that design can change the world. We're passionate about putting design to work in service of larger, more meaningful goals, whether societal, educational, medical, or cultural. We offer our clients agility and individualized attention combined with deep resources, drawn from the expertise and career-long learning of our staff. We believe that a smart solution results most reliably from a smart process, and that a project created with clients rather than for them stands a better chance of benefiting everyone involved in its implementation.

Founded in 1914, HNTB strives to exceed client expectations in the delivery of infrastructure to public and private owners and contractors. HNTB provides a full range of services beyond civil engineering, architecture, planning and construction management. We see and help address far-reaching issues of financing, legislation, technology, design, construction, community outreach and ongoing operations. As employee-owners committed to the highest levels of performance, we enable clients to achieve their goals and visions. And for nearly 100 years, HNTB has remained true to the tenets of the firm: acting with integrity and technical excellence always.

TYPES OF PROJECTS:

Power, Water/Wastewater, Utilities, Telecommunications

Centrifugally cast, fiberglass-reinforced, polymer mortar HOBAS pipe is inherently corrosion resistant and lasts 100 years or more to deliver the lowest life cycle cost. Leak-free, push-together joints and standard 20-foot pipe sections reduce installation time and costs. Superior hydraulic characteristics provide maximum flow recovery. It can be found in the infrastructures of most U.S. municipalities.

Key applications are sanitary and storm sewers, potable water and corrosive environments. It is ideal for open cut, sliplining, jacking, microtunneling, two-pass tunnel, casing carrier and above ground. Pipe diameters range from 18 to 120 inches for both pressure and gravity applications.

HOK is a global provider of planning, design and delivery solutions for the built environment. Since the firm's founding in 1955, HOK has developed into one of the world's largest, most diverse and respected design practices. We employ more than 1,800 professionals linked across a global network of 23 offices on three continents. Industry surveys consistently rank HOK among the leading firms in numerous building types, specialties and regions, and we have earned many awards and honors for our projects, people and practice.

HOK creates exceptional environments that meet the world's most complex planning and design challenges. Powerful, aspirational ideas guide our solutions.

Our work inspires people while shaping the future. HOK projects transcend their initial purposes to express timeless cultural, organizational and personal values.

Our ability to connect across markets and disciplines in every part of the world allows us to see the "big picture" and, because we approach design from so many different perspectives, gives us an unparalleled ability to innovate. We collaborate with clients and colleagues to create wonderful spaces linking people and place. Our ideas emerge from the intersection of many active minds and imaginations.

Integrated Companies, Inc. (ICI) is a professional services organization that provides program management services for the design, construction, and operation of industrial and high-tech facilities. We have a special expertise in clean environments and management of multifaceted projects, including retrofit and expansion of existing 24/7 operations in microelectronic, biotech, healthcare, and aerospace facilities.

We have developed a powerful web-based equipment and utility management system, InteMation™ that is invaluable for collaboration and communication of up to date information with the project team responsible for design, procurement, construction, commissioning, and operation of a process-intensive facility.

We have developed our Inside/Out™ method for managing complex, fast-track projects with an equipment-centric focus that places an emphasis on the front-end design process to accurately identify processes, required equipment, supporting utility infrastructure, and coordination of building spaces to successfully satisfy the business needs.

IWS specializes in the Design-Build and construction of onsite water and wastewater treatment facilities throughout the Western US, generally in areas not having access to municipal sewer/water. IWS also provides water reuse and green building solutions (rainwater harvesting, water reuse, grey water) in urban areas. IWS can self-perform most construction work and has civil engineering capabilities to offer a turn-key or Design-Build package. IWS teams with prime contractors that want an experienced Design-Builder to handle the water/wastewater aspects of their project. Projects include schools, retail, resorts, hospitals, industrial plants, sport complexes, military facilities, churches, and resorts.

James McHugh Construction Co. has earned its reputation as a builder of landmark, one-of-a-kind structures. This success has contributed to the company's long-standing commitment to creative construction solutions, innovation and a devotion to its staff. With expertise encompassing every area of construction - including commercial structures, large-scale residential buildings, historic rehabilitation, retail and industrial facilities, hospitality, transportation and roadwork - McHugh provides the full-service capabilities that clients require for any size project. In addition, McHugh offers a wide range of preconstruction services tailored to each client. The company's in-house staff will assist with site selection, plan reviews, cost analysis, value engineering and contract administration.

Founded in 1974, Judy Construction Company is a general contractor, specializing in water and wastewater treatment facilities, bridge and commercial building construction. Located in Cynthiana, KY, we operate in a 350-mile radius of Central Kentucky. In 1998 we were chosen by the Louisville-Jefferson County Metropolitan Sewer District as their principal partner in the first design/build municipal wastewater treatment plant in the state of Kentucky. We own a large variety of construction equipment which allows us to self

perform many different phases of our projects. Construction projects range from \$500,000 to \$30,000,000.

Kahn works with clients to plan for, design and execute all aspects of a building project. We're proud that our range of expertise surpasses what it takes to renovate or build a new facility from the ground up. We can also work with you to address a range of business and management needs. Commissioning, facility & relocation management, program & construction management, strategic facilities planning and sustainability analyses are just a few of the services we've been offering clients in the corporate, healthcare, automotive, industrial, research and technology, higher education and government markets since we opened our doors in 1895.

Kiewit is one of North America's largest and most respected construction organizations. For over 120 years, we have delivered world-class solutions to projects of every size, in every market. The depth of our resources is reflected in the variety of projects we construct - from roads and dams to high-rise office buildings and power plants. No job is too large or too small, too complex or too challenging for Kiewit. Our unique network of decentralized offices, backed by a multi-billion dollar organization, allows us to tackle projects of any size, in any market. Our goal for every project is the same - build it safely, on time, on budget and with no surprises.

Klassen Corporation is a privately held architectural firm, general contractor, design-build constructor, and construction project manager licensed to practice in California, Arizona and Nevada. We take great pride in our quality performance and ethical business practices that have earned the company a loyal list of repeat business clientele including major corporations, educational institutions, health care providers and agricultural industry members. The family tradition of successfully completing projects spans seven decades and is built upon the practice established and enhanced over the years by its commitment to delivering consistently fine design and quality structures. Instead of seeking short-term financial gain, we always create a zone of comfort for our client that focuses on the long-term horizon of the relationship in an atmosphere of mutual trust and professionalism. Klassen Corporation has a multi-discipline practice and is one of only a handful of firms that provides complete architectural design services and project management and construction to any client relying on its own internal resources and personnel without having to form a partnership or joint venture with others to deliver single-point responsibility design-build services.

The Korte Company was founded in
1958 on the belief that
professionalism, quality and value
added services are fundamental to
a successful company. Fifty-three
years later, that philosophy has
earned Korte the reputation for
delivering high quality, responsive
services to our clients nationwide.

Throughout our history, Korte has
pioneered both design-build and
construction management as
effective project delivery methods.
Our staff includes architects and

engineers to provide a full range of
integrated design and construction
services. Korte was one of the
seven founding members of the
Design-Build Institute of America.

Transportation
One of America's premier heavy civil
contractors, The Lane Construction
Corporation is the preferred partner
to connect and improve the
communities and world in which we
live. Founded by railroad engineer
John S. Lane in 1890, Lane
constructs quality highways,
bridges, locks, dams, racetracks,
and mass transit and airport
systems in 20 states. Lane and its
11 affiliates also produce
bituminous and prestress concrete,

The Lane Construction Corporation - cont'd

and mines aggregates at 70 plants and 11 quarries from Maine to Florida to Texas. In its over 120 year history, Lane has never failed to complete a contract.

Founded in 1970 and
headquartered in Elmwood Park, NJ,
Langan (www.langan.com) provides
integrated site engineering and

environmental consulting services
for private developers, property
owners and public sector clients.
Firm services include site/civil,
geotechnical, and environmental
engineering, as well as landscape
architecture and planning, survey/
mapping, BIM-compatible 3D Laser
Scanning, traffic/transportation,
CADD/GIS, natural and cultural
resources/permitting, and
sustainable design consulting.
Langan employs more than 500
professionals and has regional
offices in New York City;
Philadelphia, Bethlehem, and
Doylestown, PA; New Haven, CT;
Trenton, NJ; Arlington, VA; Miami
and Tallahassee, FL; Las Vegas, NV;
and Irvine, CA. With more than 125
LEED APs, the firm ranks among the
top 30 Green Design Firms by
Engineering News-Record and has
consistently ranked among the Top
5 Best Engineering Firms to Work
For by Civil Engineering News.
Langan International, the worldwide
subsidiary of Langan Engineering &
Environmental Services, with offices
in London, Athens, Abu Dhabi and
Dubai, provides all firm services to
private and public sector clients
around the globe.

LCS is a team of general
contractors and construction
managers dedicated to the
planning, design, construction and
facility support of laboratories and
technical facilities. We provide a
broad range of services including
new construction, laboratory
relocations, remodels and
renovations, interior build-outs and
tenant improvements, portable and
temporary lab buildings,
environmental rooms and
cleanrooms. We work to meet your
needs and can take your vision and
transform it into a laboratory or
technical facility tailored to your
individual requirements. We
possess extensive experience with
the construction, maintenance and
design support of laboratories and
technical facilities for any size
project. We work with you to define
objectives and identify project
challenges and solutions resulting
in a practical, cost-effective, and
efficient facility. LCS also provides
ongoing facility support and

maintenance to ensure your facility
remains safe and fully operational.

Marous Brothers Construction offers
a powerful combination of
experience, creativity and depth of
services that ensure the successful,
on-time and on-budget completion
of your construction project. We
self-perform the majority of
construction services, making us
one of the few construction firms in
the Midwest that can call ourselves
a true builder. This approach gives
us greater control of design
elements, schedules, budgets and
most importantly, quality and
workmanship. We offer a continuum

of services including General
Contracting, Design/Build and
Construction Management. Our
Special Projects Group is dedicated
to handling projects up to \$3
Million, while our in-house divisions
offer independent site, concrete,
carpentry and interior finishes
services. For over 30 years, our
award-winning staff has helped
other developers and owners like
you realize the potential of their
dreams. It's time to put Marous
Brothers Construction, a real
builder, to work for you.

McCarthy is one of the nation's leading builders. We provide an array of design-build services to owners in a variety of markets including healthcare, education, commercial building, laboratory, pharmaceutical, food and beverage, manufacturing, power, and automotive. Over 1700 employees are committed to building excellence and client satisfaction in these areas: Atlanta, Dallas, Houston, Las Vegas, New Mexico, Newport Beach, Phoenix, St. Louis, San Diego, San Francisco, and Sacramento. Because we are true builders, our clients get more and better options, faster and safer execution, and a clear cost/benefit solution that yields the best final cost, every time.

Since its inception in 1977, The Miller|Hull Partnership, has been recognized as a design leader in the Pacific Northwest. The firm has received over 160 design awards in 28 years, including the 2003 Firm Award from the National American Institute of Architects. The design philosophy of Miller|Hull centers around two essential architectural ideas. One is to use a building's structure and program to create a significant place within a site, and the other is to be sensitive to climate and to respond to environmental demands with the form of the building.

The Miller/Hull Partnership, LLC - cont'd

These ideas have allowed Miller/Hull's projects to convey a harmonious balance between form and nature. The current staff of 59 includes 23 licensed architects and 13 LEED™ Accredited Professionals. Design leadership is shared equally among three of the four partners: Dave Miller, Robert Hull and Craig Curtis; Norman Strong acts as the managing partner.

Monterey Mechanical Co. is a mid-sized general contractor, which was founded in 1942 and is located in Oakland, California. Our core business is general engineering construction of water and wastewater treatment plants, pump stations, chemical facilities, power generation plants, material handling plants and industrial manufacturing plants. Independent of our general contracting work Monterey Mechanical performs civil and millwright work, process piping and mechanical equipment installation along with HVAC and metal fabrication. Monterey Mechanical has completed construction projects using both the design-build and the traditional design-bid-build project delivery system. The geographic areas of Monterey Mechanical projects are: California, Nevada, Alaska and Micronesia.

Moss & Associates is a privately
held construction company that is
ranked among the nation's top 100
building contractors with annual
revenues averaging \$440 million
over the past five years. Through its
offices in South Carolina and
Florida, our firm provides design-
build, general construction,
construction management and
preconstruction consulting services
throughout the United States,
Bahamas and Caribbean.

As a Design-Builder, Moss &
Associates, joins with owners in
establishing overall project
objectives, site evaluation/
selection, development of program,
and establishment of early firm
price and schedule. Moss &
Associates also has the ability and
capacity to deliver a Design- Build/
Financed turnkey project if required.

Motion is a leading global provider
of slate tablet PCs and mobility
solutions that significantly improve
field productivity through access to
technology at the point of service.
The company's rugged, integrated
tablets and solutions are designed
to provide portability, security,
power, and versatility across often
harsh work environments. Built with
the business user in mind, Motion
tablets fit seamlessly into existing
enterprise environments, offering
users access to critical information,
no matter where work takes them.
In addition to Motion's current
J3500 and F5v Tablet PCs - the
new CL900 delivers mobility and
durability in a compact package
supporting highly mobile users.

NASA's real property assets, including land, buildings, facilities, roads, and utility systems, constitute a major capital investment. NASA is the ninth largest federal government property holder. The Agency owns more than 100,000 acres of real estate and over 5,400 buildings and other structures totaling more than 44 million square feet. The current replacement value for NASA real property is over \$30 billion.

Neeser Construction, Inc. is a Design/Build firm that has never missed a completion date or exceeded a budget. Typically, the company is well ahead of the established schedule. The company's percentage of contractor-initiated change orders runs well below the industry standard. Mitigating cost impact takes quality people with a willingness to cooperate and share knowledge with clients.

Jerry attributes his success to his philosophy of wholly managing a project. The people at Neeser Construction feel it's their responsibility to maintain control over all aspects of a project-subcontractors, their own crews, equipment, supplies, and during design/build, the designers.

Since 1963, Pankow has benefited
clients through creative problem
solving, engineering expertise and
construction innovation. Pioneers of
design-build and integrated project
delivery, we provide a full range of
construction services for complex
projects, both ground up and in
occupied facilities. We add value to
project teams with our expertise in
design management, LEED design
and construction, Building
Information Modeling (BIM) and
Lean Construction practices, and
with a commitment to quality,
safety and exceptional client
service. Pankow is as solid as the
structures we build, retaining
significant bonding capacity and
one of the lowest bond rates
among private contractors in the
U.S. We have never ended a project
in litigation with an owner in our
48-year history.

Pro Con Incorporated provides a full range of design, general contracting, and construction management services in all levels of corporate, commercial, industrial, and institutional building types throughout New England and selected sites around the country.

Our long term stability and innovative philosophy, including Integrated In-House Design-Build, has enabled us to employ and retain the most highly skilled design construction, managerial, and administrative professionals in the industry. This unique talent pool allows us to draw on the skills and opinions of "specialists" as members of our in-house staff with regard to disciplines that include civil engineering, structural engineering, and architecture.

Pro Con's reputation for delivering projects on schedule and within budget is evidenced by the amount of repeat business and negotiated construction management work our company performs, which comprises over 85% of our contracts, as well as our ever growing list of high profile, demanding clientele. We have built upon the steadfast belief that superior client service would not only serve short-term accounts but produce long-term relationships. Our firm is recognized as a leader in answering today's aggressive schedules and budgets. Our clients come to us with the knowledge and confidence that their projects will be managed with the highest degree of professionalism and quality workmanship.

Established in 1966, Reames and Moyer, Inc. Design/Build Mechanical is an integrated mechanical contracting firm specializing in Design/Build plumbing, HVAC and process piping systems for commercial and industrial buildings with emphasis on fast track projects. On staff Professional Engineer and in-house AutoCad capabilities insure fast turnaround of design drawings - a necessity in fast track construction. Our close working relationships with municipal plan reviewers expedite the permitting process.

A quality design is only as good as its installation. We take pride in our experienced field personnel - some have been with the company since its inception. Our stable, long term workforce continues to produce consistent, high quality workmanship with safety in mind. When working in central Virginia, consider Reames and Moyer, Inc. as your Design/Build mechanical contractor for your engineering and construction team.

At SAIC, we provide innovative,
integrated solutions that strengthen
our customers' enterprises and help
them thrive in an increasingly
complex world.

In today's challenging market,
driving performance requires
innovative solutions that overlap
energy, environmental,
infrastructure, and business
considerations - all in a capital-
constrained market. From
integrating technologies to
designing, building, and operating
infrastructure systems, we help our
customers mitigate their costs and
risks. We do this by bringing the
right people, technology, and
systems together and leveraging
knowledge across the business life
cycle to deliver the innovative,
integrated solutions our customers
require.

Shambaugh & Son, Inc. has been in the construction/engineering business for more than 80 years. We specialize in Design/Build and fast-track project delivery and provide a full range of new and retrofit construction for industrial, commercial, and institutional projects. We "self-perform" in nine broad disciplines including mechanical, mill wright, process, refrigeration, electrical, process controls, water and waste treatment, fire protection, and temperature controls. We complete over \$270 million total volume per year, with over 1400 employees throughout 40 states. Over 70% of our work is done on a design/build, "single source," turnkey basis. We have also been recognized nationwide as a progressive leader in our industry, with National Contractor of the year honors, 4 US Food Plant of the Year Awards, and DBIA's National Industrial Project Awards of Excellence in 1998 and 1999. Corporate Mission Statement: Recognizing people as our most important resource, our mission is to produce our industry's highest level of quality services and productivity on every project in

order to develop repeat customers, maximize return on investment and provide growth opportunities for people in our organization.

SMRT's roots go back to 1884,
when John Calvin Stevens
established his architectural design
firm in Portland, ME. Today, SMRT is
a full-service firm providing
architecture, engineering, planning,
landscape architecture, interior
design and commissioning services
for clients throughout the Northeast.
With offices in New England and
New York, we provide specialty
services to healthcare, criminal
justice, science/technology/
industry, education and government
clients. These clients tend to have
one thing in common: the need for
complex buildings. From
cleanrooms to classrooms, from
hospitals to secure facilities -
projects in these sectors require a
high level of design, coordination
and oversight.

Southland Industries is an employee-owned, specialty contractor with offices throughout the United States. Southland specializes in design-build HVAC, Plumbing Process and Fire Protection systems and averages \$315,000,000 in annual contract volume.

Design-Build maintain is the backbone of Southland's corporate culture and our conduit for innovation. Our design-build

expertise, in-house engineering and ability to self-perform our work has made us a valuable asset to owners and general contractors alike. As a member of successful design-build construction teams we have contributed to winning major design-build competitions for projects. Southland's factory trained technicians maintain the systems and ensure they are operated in accordance with the design intent. As a result, Southland is a premier design-build maintainer of mechanical systems that enable our customer's businesses.

Speed Fab-Crete is a fully integrated general contractor specializing in design-build applications. The company is one of the nation's first TRUE design-build general contractors. Several of its owners and managers are Designated Design-Build Professionals, a certification by DBIA. Celebrating 60 years as a construction industry leader, Speed Fab-Crete also is the oldest, continually-operating, precast concrete manufacturer in the Southwest! The company's clientele include schools, government entities, dealerships, retailers and churches. Texas Construction Magazine ranks Speed Fab-Crete among the state's top contractors, and the Fort Worth-based firm is annually listed among DFW's best 20 general contractors.

TYPES OF PROJECTS:

General Commercial, Church/ Religious, Hospitality, Educational Facilities, Federal Facilities, Retail, Hospital/Healthcare

SR Construction was established in 1991. We concentrate on those projects that require extensive planning and scheduling, and where the user demands a product of the highest quality and appreciates a construction company devoted to customer service before, during, and after project completion. Our projects span a wide range and include extensive and complex medical projects, church facilities, day care centers, veterinary hospitals, Class "A" offices, restaurants, retail, and industrial buildings. Since the inception of SR Construction, we have concentrated on and promoted the "team approach/ design-build" process as the best vehicle for providing a quality construction product to our clients. This is evidenced by over 85% of SR Construction's annual volume being negotiated and all work being for repeat clients or by referral.

Stacy and Witbeck, Inc. is a privately held employee-owned corporation headquartered in Alameda, California. With revenues of \$460 million for 2011, we are one of the largest transit contractors in the nation. Our company resume includes the construction of over 300 rail transit projects throughout the United States for numerous agencies. We have experience in all aspects of transit construction including earthwork, utility work, structures, bridges, rail work, systems, and systems integration. Stacy and Witbeck excels on projects where innovation, quality, cost objectives, safety, and community relations are primary concerns. We have completed some of the most challenging streetscape and transit projects in the country.

Steinberg Architects is one of the
leading architects of design-build
projects in California for higher
education and public-sector clients.
The firm was one of the pioneers in
the adoption of this delivery
method for the California
community college system through
several Pilot programs. As an early
adopter of this method, Steinberg
Architects has gained a
comprehensive understanding of
the benefits and complexities of
implementing design-build. The firm
has been involved in both ends of
the design-build process, from

serving as the architect-of-record
on design-build teams to
developing design-build standards
and bridging documents.

Stellar is a fully integrated firm
focused on design, engineering,
construction and mechanical
services worldwide. Stellar delivers
comprehensive capabilities from a
single source by offering additional
services as safety consulting, real
estate services, energy/utility
systems, refrigeration equipment,
refrigeration parts, and control
systems. With over 600 employees,
Stellar conveys an unparalleled
level of service to owners utilizing
design-build, general contracting
and construction management
approaches. In addition to its
Jacksonville, Florida headquarters,
Stellar maintains more than
12 strategic support locations
throughout the United States, as
well as an international office in
Dubai, UAE. Stellar is consecutively
ranked as one the Top 100 Design-
Build Firms in the nation.

Since 1890, Sundt Construction has been steadily building a reputation for quality and dependability on commercial, industrial, heavy/highway and institutional projects. Sundt is known worldwide for its innovative methods, highly skilled personnel and dedication to meeting its clients' needs. Sundt Construction has conducted nearly every type of building in use today, for both private and public sectors while serving as general contractors, design-builders, construction managers at risk and build-to-suit contractors. As Sundt enters its second century, a third generation of Sundt management continues the tradition of excellence in construction.

Symbiont Design-Build LLC has been providing design-build project deliveries for numerous Fortune 100 companies since 1981. Symbiont differentiates itself in the marketplace with its 'engineer led' design-build project delivery model. We establish a guaranteed maximum price with our clients and perform our work under an open book cost plus contract. All equipment and trade contracts are competitively bid and bids are evaluated and shared with our clients to select vendors and contractors that offer optimum value. Most importantly our 'engineer led' model allows Symbiont to guarantee system performance. Our delivery model and commitment to meet performance requirements ensures our clients get the maximum value from their investment.

Thompson Engineering was established in 1953. Headquartered in Mobile, Alabama, we have ten offices and multiple satellite offices located throughout the southeast. Thompson is one of two firms that is a subsidiary of Thompson Holdings, Inc. Our sister company, Watermark Design Group, is an architectural and interior design firm. Between the two firms we are capable of providing a broad range of architectural/engineering services.

Thompson is an employee-owned firm with over 325 personnel in multiple disciplines. Our staff has a vested interest in providing safe, quality driven, successful projects that are completed on time and within budget. Our business relies heavily on our performance and the repeat business of satisfied customers.

Baltimore District is part of the U.S. Army Corps of Engineers' North Atlantic Division. With more than 1,300 employees, it is the largest of six districts in the division and one of 14 Corps districts worldwide with both a civil works and military construction mission. Our area of responsibility covers the District of Columbia, Maryland, Pennsylvania, West Virginia, portions of southern New York and parts of northern Virginia. We are responsible for water resource development in the Susquehanna and Potomac River drainage basins and the Chesapeake Bay north of the Maryland-Virginia line.

When you select Uniland
Construction Corporation as your
builder, you not only benefit from
the firm's accumulated best
practices, gained from constructing a
variety of building types. You also
receive the Uniland advantage. The
firm's unique construction
management team includes
in-house project managers,
estimators, architectural designers,
property managers and mechanical
system specialists who provide key
input and advice on every job.
Since 1974, Uniland has designed
and constructed more than 12
million square feet of commercial
properties. In fact, the firm has
developed more buildings for
Fortune 500 clients than any other
builder in the Buffalo-Rochester, NY
corridor.

VHB is a recognized leader in the fields of transportation, land development and environmental services, with nearly 1,000 professionals in 17 offices throughout the East Coast.

Providing multidisciplinary planning, design, engineering and consulting for some of the nation's most complex infrastructure and development initiatives, VHB experts take projects from concept to completion. Our expertise in integrating design services has proven to be the key ingredient and foundation for our successful "Innovative Project Delivery" program.

VHB's collaborative approach to strategic project planning, along with proactive management and nationally recognized experts, help our clients and our communities solve critical problems. Premier building publication Engineering News-Record has ranked VHB 84th of the top-500 U.S. design firms, and among the top transportation firms in the nation. CE News Magazine has consistently named VHB one of the Best Civil Engineering Firms to Work for in the U.S. For more information about VHB, visit www.vhb.com

VoltAir Consulting Engineers, LLC is a minority owned corporation with offices located in Florida and Texas. Julius D. Davis, P.E., LEED® AP, and Jorge L. Rivera, P.E., LEED® AP, have provided quality professional engineering and related services for over 35 years combined. VoltAir Consulting Engineers affords mechanical, electrical, plumbing, HVAC, fire protection, and communication and technology engineering designs. As a minority business, we are MBE, DBE, SBA 8(a), and SBE Certified. We are consistently seeking new and challenging opportunities in the A/E industry to help our business meet its full potential.

The VoltAir team takes great pride in the quality of our work. Our mission is to practice quality engineering as well as providing personal, cost efficient, dependable, and professional services. VoltAir's promise is simple—we'll engineer your vision.

Since 1939 Wight & Company has been a leader in integrated solutions for the built environment. Wight provides comprehensive architecture, engineering, and construction management services to public and private clients. Design-build is the capstone of Wight's construction services, and we have perfected it to include procedures that allow for proactive management of all aspects of a project. With building information modeling (BIM), Wight's constructors collaborate with in-house design teams by using one information source in a real-time application. As the designer/design-builder of more than 30 LEED Certified or registered projects, Wight is committed to sustainable design and construction principles.

Williams Design Build (WDB), is a fully integrated design and construction firm with over thirty-two (32) years of experience serving public and private clients. Offering comprehensive services that are delivered by a single source, WDB's foundation is rooted in service to our clients and employees that is demonstrated through our commitment to quality. The foundation of our approach is based on the following principles:
'Service to our clients and employees with an attitude of humility, to do what is right and just and to love kindness.
'Quality of service in our relationships, our process and our actions is our legacy.

Woodruff Design, LLC is a progressive design-build firm that specializes in industrial and commercial projects. We have extensive experience with design-build delivery and it is our preferred solution for construction projects. The team works together to fulfill parallel objectives, including aesthetic, function, quality, budget, schedule oversight and ease of changes during construction. We have multiple principles within the company that are LEED Accredited. Woodruff serves our clients from our three offices in Fort Dodge, Ames and Iowa City, Iowa.

We offer services in General Contracting, Design/Build, Construction Management, Historic Renovation, and self-perform Site, Concrete, Carpentry and Interior Finishes through our in-house divisions.

CONTROL SYSTEMS INTEGRATION

REVERE

Revere Control Systems

2240 Rocky Ridge Road
Birmingham, AL 35216
Phone: (205) 824-0004
Fax: (205) 824-0439
E-mail: brucek@reverecontrol.com
Web: www.reverecontrol.com
We make the control systems that drive the industrialized world. A venerable supplier of automation and control integration services and systems to the water and wastewater industry because of the total focus on providing long-term value in every aspect of what we deliver to our customers. All our systems are engineered, built, tested, installed, and supported with the goal of having them serve users well into the future. That's part of our belief that "better controls mean better business." Expertise in SCADA, radio telemetry, HMI & PLC programming, video surveillance, VFDs, MCCs, and pumping applications. More than twenty-five years of experience. Full simulation testing to reduce installation and startup costs. Comprehensive documentation to support long-term maintainability. Web-based access to all drawings, programs, and manuals to aid support. CSIA (Control System Integrators Association) certified, and PMI-certified project managers. Supports design-build project delivery methods.

PRECAST CONCRETE STRUCTURES

Better Building Through Technology

Tindall Corporation

3076 North Blackstock Road
Spartanburg, SC 29301
Phone: (864) 595-3315
Fax: (864) 595-3344
E-mail: chrisspalumbo@tindallcorp.com
Web: www.tindallcorrections.com

Tindall is a diverse industry leader in the design, manufacture and erection of precast, prestressed concrete systems. With expertise in mixed-use, education, commercial, industrial, wind energy, nuclear power, underground utility structures, fully upfitted modular systems for prisons and other high occupancy structures and parking structures, Tindall continues to develop next generation solutions through a continuous product research and development program. Since 1963, Tindall has delivered specialized solutions for major projects and continues to provide budget, schedule and quality focused projects from its five manufacturing facilities in Virginia, South Carolina, Georgia, Mississippi, and Texas.

STEEL FIBERS

better together

Bekaert - Dramix Steel Fiber Division

1395 S Marietta Parkway Building
500, Suite 100
Marietta, GA 30067
Phone: (770) 514-2206

E-mail: heidi.helmink@bekaert.com

Web: www.bekaert.com/building
Bekaert's Dramix® steel fiber products are widely used in the construction sector for concrete reinforcement. Dramix is a safe, time saving alternative for traditional steel mesh and bar reinforcement. Dramix steel fibers have been reviewed and approved by the ICC Evaluation Service, US leader in evaluating building products for compliance with building codes. Dramix is the first steel fibers to receive ICC-ES AC208 certification. The criteria evaluated Dramix as an alternative to reinforcement in concrete footings and slabs. The evaluation procedure includes many different assessments; steel fiber properties, concrete compressive and flexural strength, and the average residual strength.

Southland Industries has been around for a long time, yet we've only gotten better with age, as evidenced by the work performed in our Northern California, Southern California, Southwest, and Mid-Atlantic divisions. We have provided innovative mechanical solutions and services, with faster delivery, for a better value. And by adhering to our Design • Build • Maintain principles, our mechanical systems are among the industry's most progressive and technically designed, to support the people who occupy your building – and the business you serve.

Construction Costs Reduced
Avoid Unnecessary Utility Relocations
Reduce Surprises during Construction
Design Smarter, Construct Faster
No More Schedule Delays
Outstanding Success on Design Build Projects!

Cardno TBE helped write the book on Subsurface Utility Engineering (SUE). We were instrumental in the development of publication 38-02 of the American Society of Civil Engineers . We are the firm, more than any other, which sets the pace for innovation and establishes the benchmark for the practice of Subsurface Utility Engineering.

As the largest SUE provider in the world, we offer your team the most comprehensive resources and advanced SUE technology. We are the only SUE firm with the ability to handle the largest of projects located anywhere in North America. We pride ourselves on rapid response and providing the most reliable and accurate utility mapping in the industry. Time is money, so getting quality results into the hands of designers quickly and correctly the first time is what Cardno TBE does best! Our work can often result in the elimination of utility conflicts up front in the design process rather than encountering costly delays and unnecessary utility relocations during construction. Cardno TBE – rely on us for SUE!

For more information contact any of our three SUE principals:

North - bob.clemens@cardno.com, 317.585.3540

West - john.harter@cardno.com, 727.531.3505

Experience the power of the New Millennium advantage...

In your hands and at your fingertips!

Our latest catalog features SJI 43rd updates – and our NEW web-based and mobile specification tools provide the easiest way to specify steel joists, joist girders and metal decking.

Digital specification tools... for a better steel experience.

Our commitment to building a better steel experience embraces the use of digital technology to further simplify and accelerate the steel package design process. New Millennium pioneered IPD (integrated project delivery) with steel joists by making BIM-based process management a reality. Since early 2010, Dynamic Joist® has been the leading choice for BIM-based steel joist 3D design.

Introducing yet another industry first: Digital Specification Tools. Built upon our engineering expertise in steel joist and metal decking, and backed by our database of SJI 43rd Edition load and weight tables, New Millennium packs the power of our latest specification catalogs into advanced web and mobile applications.

You will find everything you need... from standard steel joists and joist girders, to our industry-leading special profile steel joists, to a wide range of roof, form, and composite floor decking.

Whether you're in the office or out in the field, New Millennium has you covered. Visit our website and go digital today.

- **Easier and faster specification**
- **Helpful cost-saving guidelines and options**
- **Mobile app for on-the-go convenience**
- **Complete range of digital design tools:**
 - Standard steel joists and steel joist girders
 - Special profile steel joists
 - Metal decking

RESOURCES > SPECIFICATION TOOLS > K-SERIES & LH/DLH SERIES

K-Series & LH/DLH-Series Standard steel joist specification tool

Determine your steel joist by one of the following:

☐ "Lowest weight" steel joist per SJI standard load tables

☒ "Lowest cost" steel joist per New Millennium economical load tables

Design Methodology: ASD

Required Joist Specifications

| Span (ft) | Dead Load (psf) | Live Load (psf) |
|-----------|-----------------|-----------------|
| 40 | 25 | 15 |

Live Load Deflection: L/240

Spacing Between Steel Joists (ft): 5

Total Design Load (plf): 200

Optional Joist Specifications

Max. Joist Depth (in): Select

Joist Series: Select

Joist Designation: 24K5 Joist Self-Weight (plf): 7.20

| Total Bridging Rows Required | OSHA Erection Bridging Rows Required | Minimum Bearing Seat Depth (in) | Total Safe Load (plf) | Additional Joist Options |
|------------------------------|--------------------------------------|---------------------------------|-----------------------|-------------------------------------|
| 3 | 1 | 2.5 | 208 | <input type="button" value="View"/> |

Note: It may be possible to reduce the costs of labor and scheduling by eliminating OSHA Erection Bridging. [Click here to view a joist with no OSHA Erection Bridging required.](#)

Our new digital tools are just like our catalogs only faster. No more flipping through pages and pages of tables searching for the data you need, it's all easily accessible on one screen.

For example, with the K-Series & LH/DLH-Series tool, you have the option of designating a joist via "lowest weight" or "lowest cost" methods. Choose between ASD or LRFD design methodology, and specify U.S. units of measure or metric. Enter your specifications, click submit and instantly see the joist best suited for your application, PLUS all of its relative data.

As a guide to reducing the costs for labor and scheduling, a one-click feature allows you to view a heavier joist option built with a larger top chord and greater lateral stiffness to eliminate the need for OSHA Erection Bridging. Additional steel joist options relative to your spec are also one simple click away.

All of our new digital tools feature interactive simplicity... tabbed entry fields, drop-down menus for fast specification, plus the ability to go back and change your entries for on-the-fly optional designations.
